

Using The Prompt That Fills Out Audience and Product Data

Unveil audience insights through an AI-driven prompt.

1. Start with the "Prompt To Fill Out The “About The Cleanse” Section" and fill in the topic of your cleanse.

All you need to run this prompt is a topic. In this example we'll create audience insights for a cleanse that helps people reduce inflammation.

Prompt To Fill Out The “About The Cleanse” Section

PROMPT

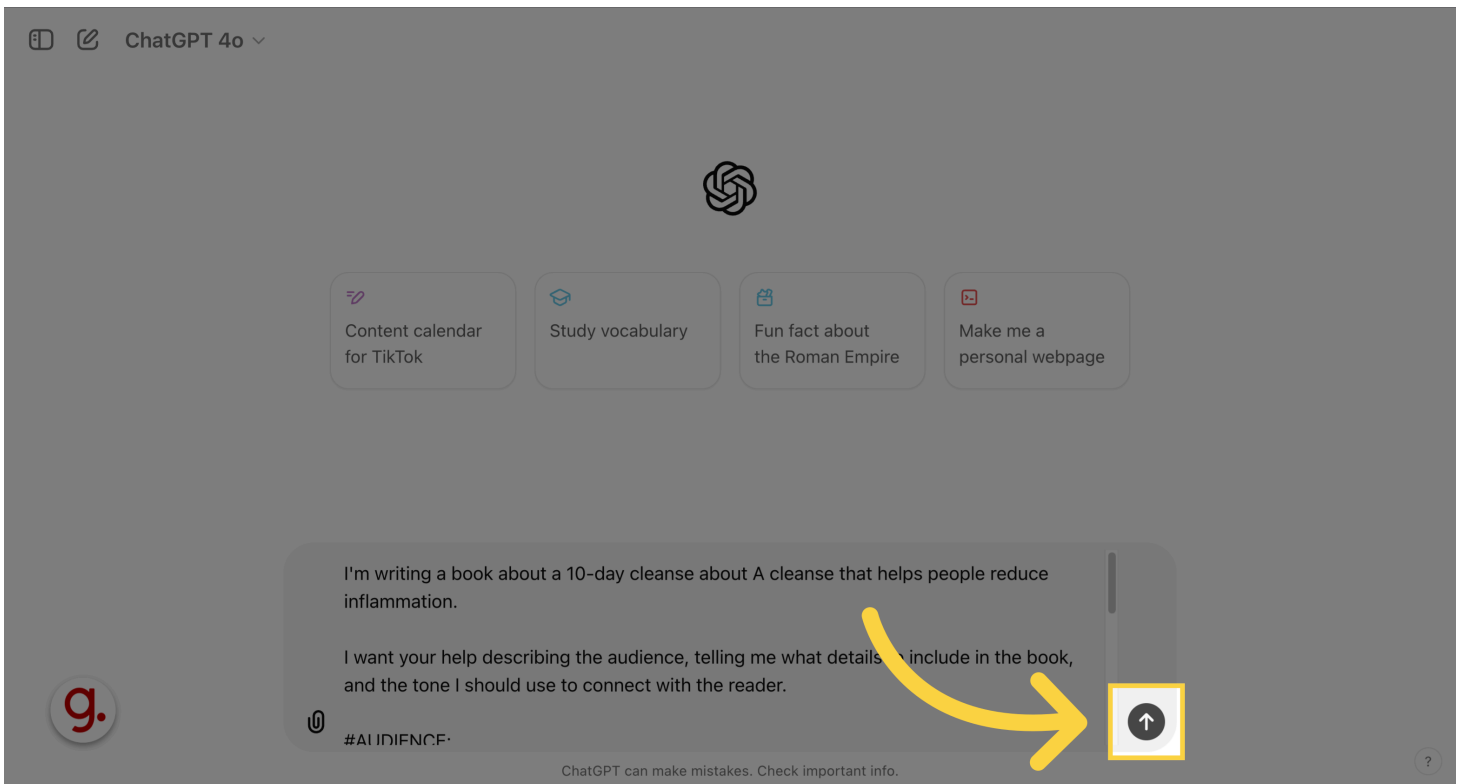

I'm writing a book about a 10-day cleanse about **A
cleanse that helps people reduce inflammation.**

I want your help describing the audience, telling me what details to include in the book, and the tone I should use to connect with the reader.

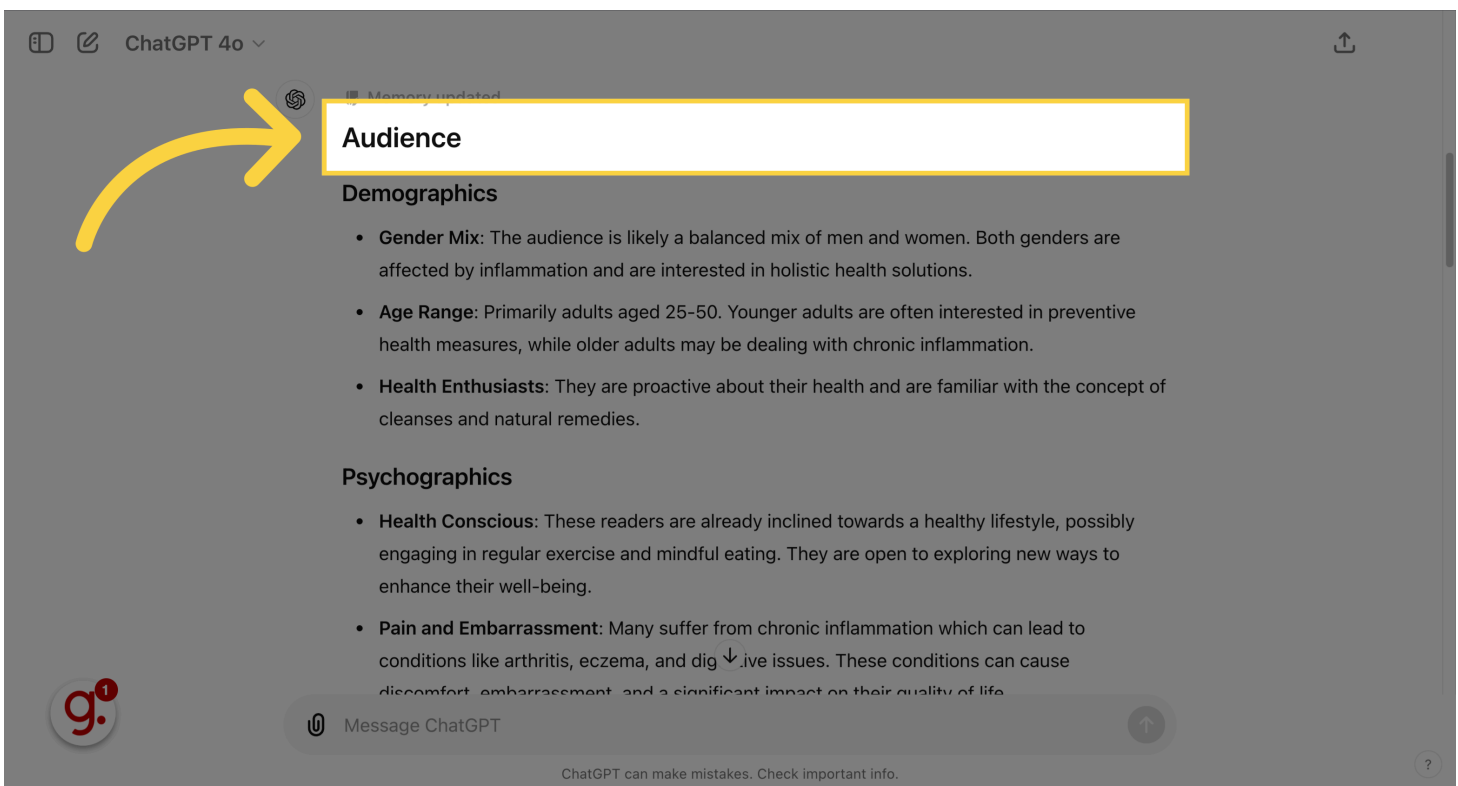

#AUDIENCE:

For the audience, tell me about the readers who

2. Paste the edited prompt into ChatGTP (or other AI LLM tool) and run it

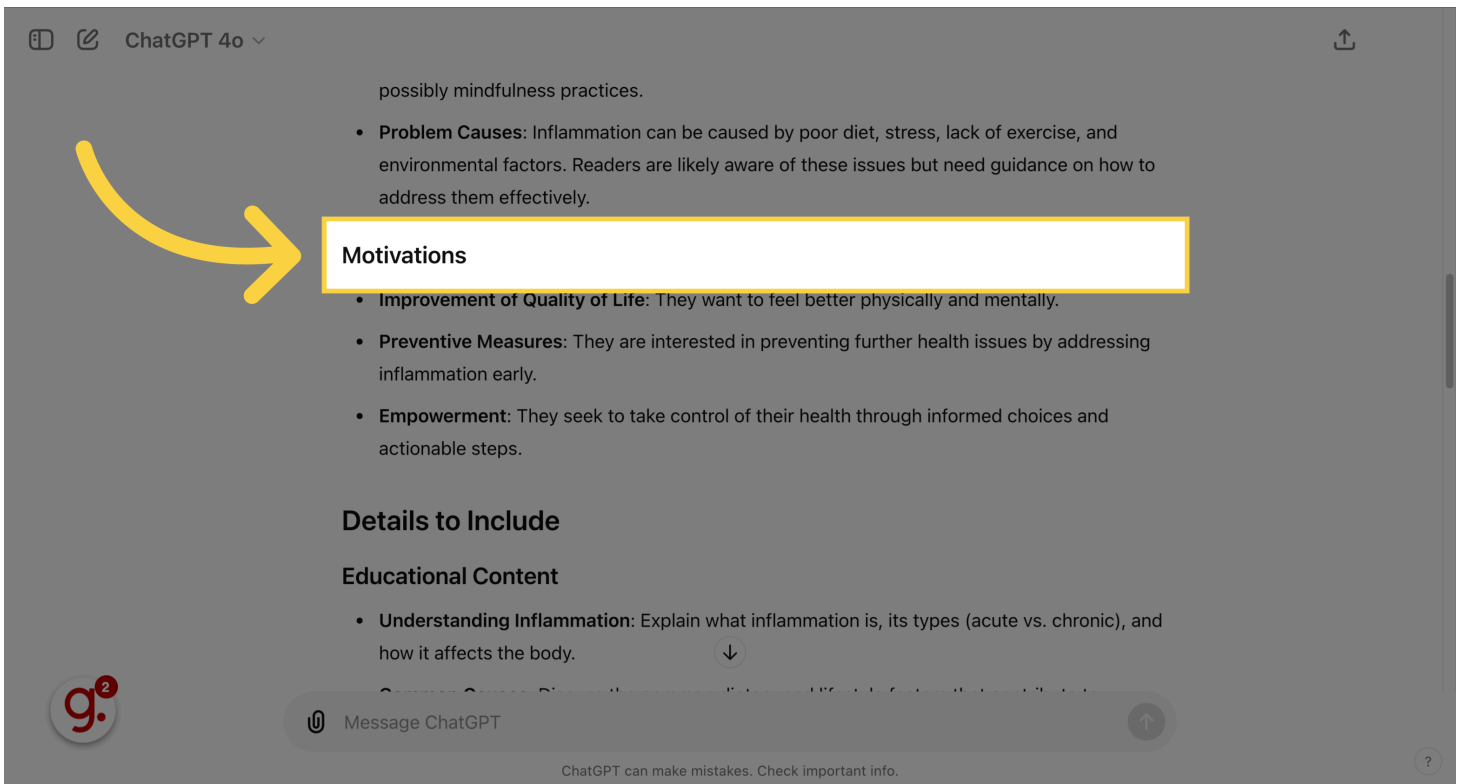

3. Here's what the prompt generated for our cleanse that helps people reduce inflammation.

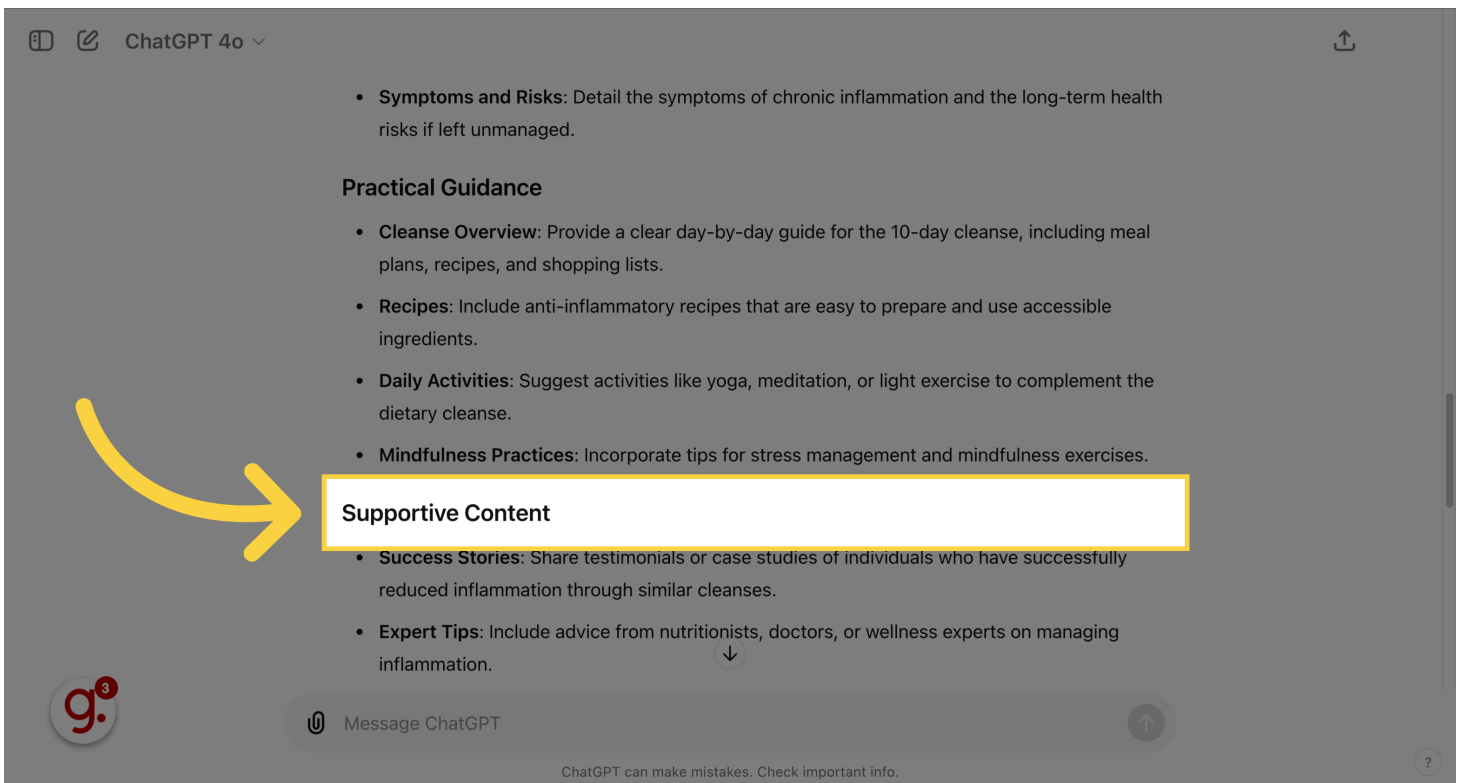

4. And more of what the prompt generated

You can see we're getting lots of good insights into this audience.

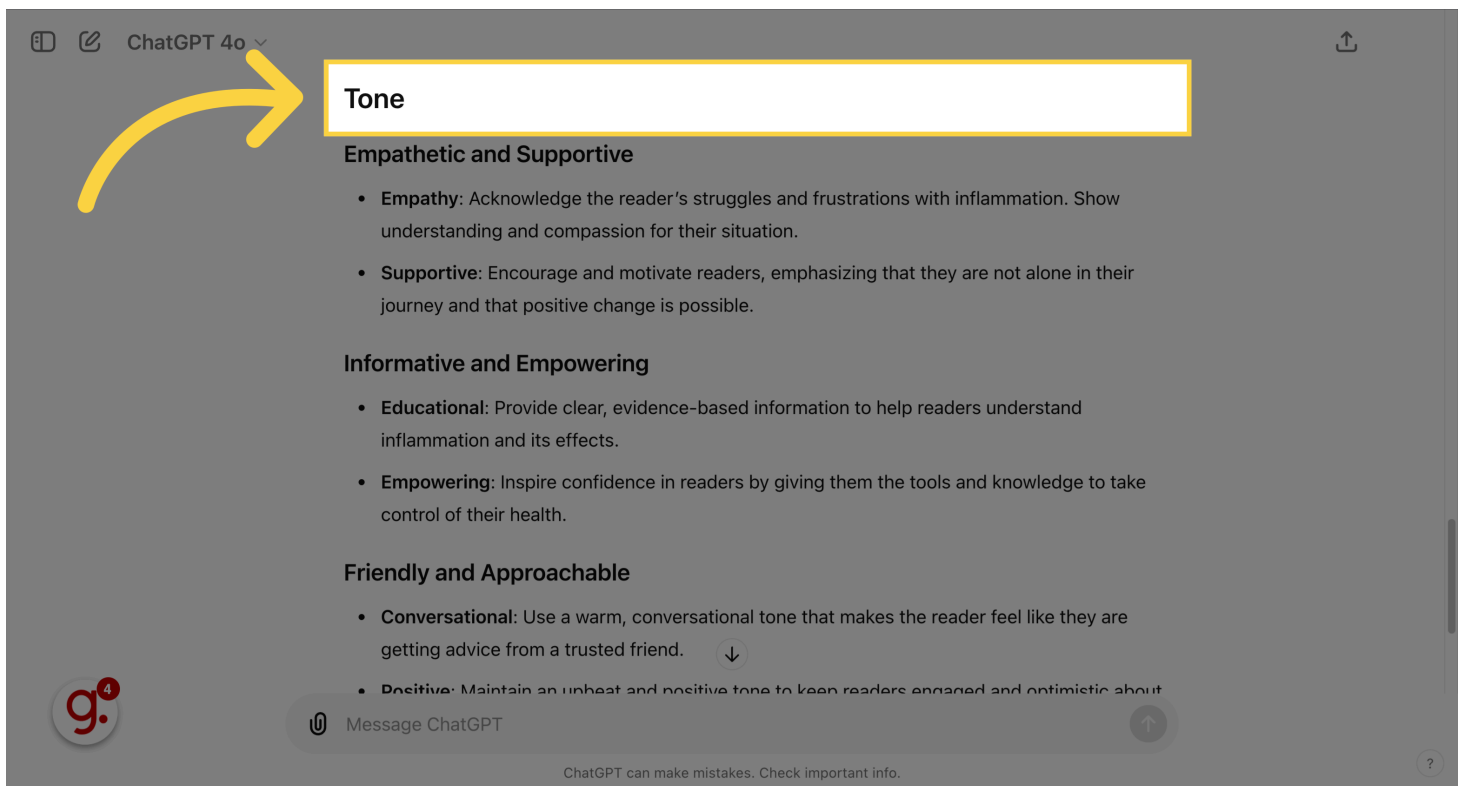

5. More from the prompt.

Now the prompt is telling us about the type of content our customers would enjoy.

6. Audience tone.

The prompt gives us the tone to use that will best connect with people interested into the topic of our cleanse.

Use these audience insights to fill out the main product creation prompt so you can generate products for niches you're not familiar with without doing hours of research.
